
Connecting Businesses with Investment Opportunities

“

Many companies come to Hong Kong to set up their offices due to the city's low taxation, sound legal system, well-developed administration and high-ranking education institutes.”

”

Sunarsih Krisfilia
Director,
Indonesia Business Advisory Limited

I am the Director of Indonesia Business Advisory Limited, a company that provides support to enterprises from Indonesia that are interested in investing in Hong Kong. We also provide services to facilitate businesses from Hong Kong to invest in Indonesia. Our services include business advisory and consultation, as well as handling tax issues in both Indonesia and Hong Kong.

I chose to set up my business in Hong Kong as it is a renowned international financial centre with innovative I&T infrastructure. Many companies come to Hong Kong to set up their offices due to the city's low taxation, sound legal system,

well-developed administration and high-ranking education institutes.

Hong Kong is also a very business-friendly city, the government offers abundant support to enterprises. The deep talent pool with high quality professionals also enhance the efficiency of our services provided to clients.

For Indonesians considering to live in Hong Kong, it's worth noting that the pace of work is relatively fast, which may differ from that in Indonesia.
